

High Speed Vacuums

The **High Speed Vacuums** work extremely well for controlling fine dry dust created by hand tools. The compact design makes it easy to use on the job site, while the high CFM motors pull in all of the fine dust. Available in several motor and tank sizes and styles to fit your needs.

- Available with one, two, or three motor configurations
- Delivers high CFM for fine dust removal
- Available with stainless steel, polypropylene, or heavy-duty polyethylene tanks
- Available with trolley, fixed cart or tipping carts

Pulsar

The **Pulsar Vacuum** is a powerful, efficient machine designed for clean-up of toxic and other dangerous substances. Available in two different sizes and three different filtration levels to fit most applications.

- Used for clean-up of toxic and dangerous substances including carcinogenic and pathogenic dusts
- Available in one or two motor configurations
- Stainless steel tanks in 7 gallon or 13 gallon size

Pump Out

This is the perfect restoration and clean-up tool. This unit allows the vacuuming of wet solutions, while pumping out the solution at a rate of 40 gallons per minute.

- Available in one or two motor configurations
- Available in 18 gallon stainless steel or 24 gallon heavy-duty polyethylene tanks
- Pumps out up to 40 gallons per minute
- Accommodates front-mount squeegee

Industrial Vacuums

Wet/Dry Vacuums

A full line of polyethylene and steel tank wet/dry cleaners for dirt and liquid pick-up are available with a variety of options including HEPA equivalent filters. Each vacuum can be customized with large area, front-mount squeegee and a variety of other tool options.

- Tank capacities up to 30 gallons
- 9-piece standard tool package and hose
- Polyethylene, polypropylene and steel tank options
- Powerful 1.5hp single, double or triple vacuum motors
- Automatic pick up with attachable squeegee tools
- Private label available
- Optional front-mount squeegee

Industrial Vacuums

Worldwide Innovation. Powerful Performance.

Industrial Vacuums

Planet 150/200/300 Tandem

The **Planet Tandem Series** provides increased productivity and efficiency with the built-in separator. The large cyclone spins out the majority of the debris before it reaches the filter. Two large drop down collection bins accommodate standard contractor trash bags that make emptying and clean up easy. These machines can also be equipped for wet pick up and the stainless steel tanks can withstand oils and other chemicals. This series of machines are well suited for the collection of large amounts of fine dust, such as concrete or terrazzo grinding and polishing, wood floor sanding or in the manufacturing or dry food processing industry.

- Built in dual Cyclonic Separators
- Available 3 phase vac motor
- Available 2 - 3 motor, 110v - 220v
- Dust collection in contractor bag
- Large 20 sq. ft. filter surface
- Manual filter shaker
- Drop down collection bins with casters for easy bag removal
- Optional float shut off for wet pick up applications
- Site glass window

Planet Optimum (Single Phase)

The **Planet Optimum** provides a unique system for cleaning the large pleated filter. The filter is guarded by a built in cyclone separator that allows the filter to be cleaned without touching it. The air circulation reversal changes the air flow to activate the self cleaning mechanism without even turning the machine off. The large drop down collection bin can be equipped to accommodate standard contractor trash bags making emptying and clean-up easy. This series of machines are an excellent choice for the collection of large amounts of fine dust, such as concrete or terrazzo grinding and polishing, wood floor sanding or in manufacturing or dry food processing industry.

- Available in 3 motor 120v or 220v configuration
- Drop down collection bin for easy emptying
- Built in cyclone debris separator
- Circulation reversal for automatic filter cleaning
- Large 26 sq. ft. filter surface

Planet Optimum Atex

The **Planet Optimum Atex** is designed for the collection of fine dust and debris in explosion environments under Atex 22 conditions. With a 3kw continuous duty 3 phase motor this machine is capable of running continuously and is available in 220v - 440v versions. Construction consists of a heavy duty cart with a large drop down collection bin for easy emptying and clean-up. With the circulation reversal, the large pleated filter can be cleaned without turning the vacuum off. Suitable for dry pick-up under explosive conditions. Can be equipped with a shut off float device in wet applications.

- 3kw continuous duty 3 phase motor 220v - 400v
- Heavy-duty drop down collection bin for easy emptying
- Built in cyclone debris separator
- Circulation reversal for automatic filter cleaning
- Large 26 sq. ft. filter surface
- Approved for dust removal in explosive environments under Atex zone 22 conditions

Planet 150

The **Planet 150** is a compact vacuum cleaner that gives the performance of much larger machines. It is well suited for the collection of large amounts of fine dust created from concrete grinding and polishing and wood floor sanding. Can also be equipped for wet pick-up.

- Available 2 - 3 motor, 110v - 220v vacuum heads
- Large filter surface with manual shaker
- Available with contractor bag dust collection
- Built in cyclone debris separator
- Large 20 sq. ft. filter surface
- Manual filter shaker
- Drop down collection bins with casters for easy bag removal

Planet Optimum Atex-C

The **Planet Optimum Atex-C** gives you all of the benefits of the Planet Optimum Atex but in a smaller package. This is a great system where storage space is a concern but you have the need for a vacuum that gives continuous running performance.

- 3kw continuous duty 3 phase motor 220v - 400v
- Drop down collection bin for easy emptying
- Built in cyclone debris separator
- Circulation reversal for automatic filter cleaning
- Large 13 sq. ft. filter surface
- Approved for dust removal in explosive environments under Atex zone 22 conditions

Planet 50/100/155

The **Planet 50, 100 or 155** gives you the performance and durability of a 3 phase continuous duty motor in an economical compact package. Well suited for use with concrete and terrazzo grinding and polishing or wood floor sanding.

- 3 phase continuous duty operation
- Split level design with dust collection in contractor bag
- Large filter surface with manual shaker
- Drop down collection bin for easy bag removal

Planet Optimum Oil

The **Planet Optimum Oil** is designed for picking up debris that is a combination of liquids and solids. The larger stainless steel strainer and pump out feature makes this vacuum an excellent choice for cleaning up metal working facilities.

- 3kw continuous duty 3 phase motor 220v - 400v
- Heavy-duty drop down collection bin for easy emptying
- Built-in cyclone debris separator
- Circulation reversal for automatic filter cleaning
- Large 13 sq. ft. filter surface
- Stainless steel separator basket to separate solids from liquids
- Circulation reversal to pump separated liquids out
- Allows separation of metals and liquids for recycling

Shake

The **Shake Vacuums**, available in different tank configurations, are a great solution for controlling fine dust collection. With the push of a button an electrical motor vigorously shakes the filter to allow the operator to continue working without stopping to clean the filter.

- Available with one or two motor configurations
- Cleans filter by vigorous shake (manual or remote)
- Available with polyethylene, steel or plastic tank
- Available with tipping feature

Dust Pro V600M

The **Dust Pro Series** gives you the same performance as machines costing a lot more money. It is compact with several motor options for many different applications. The split tank design allows the use of plastic bag to make clean-up easy for the operator.

- 2 two-stage 1000 watt motors, 110 volt
- Split level construction for dust collection in contractor bag
- Large 13 sq. ft. filter surface with manual shaker
- Conveyor cone creates cyclone affect to force debris into collection bin

Separators

Separators are a great solution for multiple applications. When used with any vacuum they significantly increase debris removal capacity. In addition the separator also prevents the vacuum's filter from becoming clogged and protects the motor from becoming damaged from harsh chemicals that may be collected.

- Connect to any standard vacuum
- Available in durable heavy-duty polyethylene
- Available in stainless steel

Barrel Vac

For jobs where large amounts of debris are being picked up the **Barrel Vac** is a great option. The adapter ring will fit any standard 55 gallon drum barrel. The power head is available in several versions including 120VAC, 220VAC and motors with electrical shake features.

- Attaches to any standard 55 gallon barrel
- Available with manual shake one or two motor vacuum heads with shake filter cleaner
- Also available in non-shake one, two, or three motor configurations (wet or dry)
