

Automatic Scrubber

CT 15

14" 4/5 Gallon

Thank you for your purchase of the IPC Eagle CT15 Compact Automatic Scrubber. To keep your Scrubber operating at peak service We recommend the following Daily Maintenance Steps:

- 1. Transport Scrubber to area where Recovery water will be dumped.
*When transporting Scrubber, please insure that squeegee is raised and machine is tilted back towards you.
- 2. Insure that Brush and Vacuum controls are in the off position
- 3. Remove Recovery Tank Lid
- 4. Remove Top Recovery Tank-Remove cover from dump hose and lower carefully in to mop sink or drain area
- 5. Using clean water source, spray out Recovery Tank to remove all debris and excess dirt
- 6. With recover tank lid off, check Foam Overflow Float to insure it is free of any debris and moving freely
- 8. Following Recovery Tank Draining and Cleaning, check water Inlet to insure it is free of debris, fill clean Solution tank using Clean Water source
- 9. With Brush off of machine, using clean water source, rinse brush to remove debris and excess dirt
- 10. Remove Squeegee Assembly from Scrubber, using clean water source and wiping cloth, insure to remove excess dirt and debris
- 11. Following above procedures, place Recovery Tank back in working position as well as Brush and Squeegee Assembly
- 12. Plug Charger Plug into Electrical outlet to insure Scrubber is fully charged for next day's cleaning
